witt lining systems

WE CAN LINE ANYTHING

# Installation Instructions

Installation procedures vary from liner to liner. The size and weight of the liner in conjunction with space limitations and available equipment will play a role in determining the best method of installation.

Fold bottom of liner toward top

Secure liner for lifting to top of tank

Unroll liner down tank sidewall

Spread liner across to opposite wall

Position in place and secure

- Warm liner to minimum of 70$^{O}$F before unpacking and unfolding liner.
- Maintain minimum of 70$^{O}$F during installation.
- Prior to installation, remove all sharp edges, weld splatter, or anything that could puncture the liner from the tank.
- Full turnkey installation services available.
